Customizing your expectations
Devoted to our clients

About Us

ETIMA started as a labeling head brand in 1984, specializing in self-adhesive labeling as a result of a long experience with AVERY DENNISON.

ETIPROCES, owner of the **ETIMA** brand, is a family company **established in 1994** with a market segment based on the design and manufacture of labeling heads, initially with adjustable speed up to 30 mtr / minute to subsequently evolve to the manufacture of **high performance labeling machines**.

ETIPROCES is currently managed by the second generation of the family and is formed by a team of professionals who have specialized in the design, manufacture, assembly and after-sales of labeling machines.

The areas of the company are divided into Innovation, **Design and Development (R + D + i), Manufacturing, Internationalization and Service.**

Year after year, our goal is to offer our customers high value-added solutions that improve communication between brands and users, as well as product traceability.

ETIMA+

Specialized in Labeling Technology

ETIMA+

offers labeling solutions in the Pharmaceutical, Veterinary & Consumer Healthcare.

Our range of linear and rotary labeling systems consists of different types of machinery depending on the application and type of packaging.

ETIMA+

is characterized by its flexibility and adaptability (customization) of its products to meet the demanding technical and production requirements of each Pharma project according to the client's URS and sector-specific regulations.

ETIMA+

offers the integration of printing or laser marking equipment for label serialization, inspection and / or verification systems (OCR / OCV), Track - & - Trace systems etc.

Integration of the 21 CFR part 11 + Audittrail.

DQ / IQ / OQ / PQ protocols.

Compliance with CE, UL, cGMP, FDA regulations.

ETIMA+

offers a whole range of services for the PHARMA labeling sector, from design, commissioning of all our products as well as FDS and FAT / SAT protocols / validations and Risk Analysis (SGS).

ETIMA BFS PHARMA

High performance labeling machine for BFS bottles and/or BFS STRIPS.
Created specifically for the Pharmaceutical sector, it grants simplicity and reliability.

- > The **ETIMA BFS PHARMA** range has been designed to guarantee the labeling, inspection and data management necessary to fulfill each client's requirements.
- > Up to 24.000 pc/min, according to format.
- > Possibility NON-STOP system up 4 labeling heads.
- > Novexx labeling heads.
- > We highlight its curved finish and the diaphanous space that remains when opening its doors, facilitating maintenance and cleaning.
- > System integration of: artificial vision or inspection, marking or Track & Trace systems.
- > Traceability matrix.
- > Services: FDS – Function and Design Specifications, FAT / SAT protocols, IQ / OQ qualification.

ETIMA⁺

ETIMA SPIN PHARMA

Labeling machine for **cylindrical stable containers**.
Created specifically for the Pharmaceutical sector, it grants simplicity and reliability.

- > For low-medium-high speeds, according to format.
- > Novexx labeling heads.
- > Possibility of label rejection before labeling.
- > System integration of: artificial vision or inspection, marking or Track & Trace systems.
- > Traceability matrix.
- > Services: FDS – Function and Design Specifications, FAT / SAT protocols, IQ/ OQ qualification.

ETIMA+

ETIMA S-PIN PHARMA

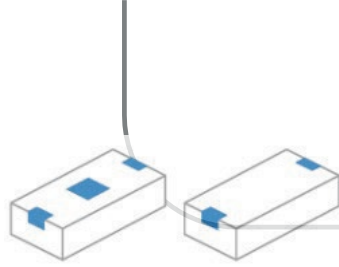

Labeling machine for **vials, cartridges, ampoules**.
Created specifically for the Pharmaceutical sector, it grants simplicity and reliability.

- > For medium-high speeds up to 500 pc/min, according to format.
- > Novexx labeling heads.
- > Very compact Footprint.
- > Possibility to install any printing and Track & Trace system in the market.
- > Product inspection, OCR prints, rejection systems.
- > Services: FDS – Function and Design Specifications, FAT / SAT protocols, IQ / OQ qualification.

ETIMA⁺

ETIMA T-EVIDENT PHARMA

High performance machine designed for the placement of a “Vignette” on the top and two self-adhesive **Tamper Evident labels**, one for each carton flap. It allows the integration of online printing as well as its subsequent verification with Track & Trace systems through artificial vision.

- > TE apply up to 400 pc/min, according to format.
- > Individual conveying and guidance of each carton.
- > Possibility to set up a “Vignette” labeler.
- > Very compact Footprint.
- > Possibility to install any printing and Track & Trace system in the market.
- > Double rejection system according to error type.
- > Change of the 2 TE coils on the operator’s side.
- > Format changeover with indicators.
- > Individual control of each carton in each station of the machine.

ETIMA+

ETIMA ROLLER PHARMA

Self-adhesive labeler linear machine for **unstable cylindrical containers**.

- > Specific self-adhesive machine for unstable cylindrical containers in horizontal position for top labeling with wraparound or partial wraparound label.
- > Special roller conveyor to accomodate the product.
- > Novexx labeling heads.
- > Integration of market printing systems and inspection or verification systems.
- > Machine designed for the pharma and personal care sectors.
- > System integration of: artificial vision or inspection, marking or Track & Trace systems.
- > Traceability matrix.
- > Services: FDS – Function and Design Specifications, FAT / SAT protocols, IQ / OQ qualification.

ETIMA

ETIFLEX PHARMA

Rotary Self-adhesive labeler.

- > Labeling machine for multi-shape containers.
- > For medium-high speed productions.
- > Novexx labeling heads.
- > Glued sidesert or topsert application.
- > Motor-driven product platforms.
- > cGMP compliant construction.
- > Motorized container height adjustment.
- > Container orienting prior to labeling.
- > Integration of any code printing and vision inspection brands.
- > Serialization capable (for label code or association of container code).
- > Synchronized servomotor-driven feedscrew, machine and conveyor drives.
- > Tool-less quick changeover.
- > Positive track and reject.
- > Vacuum soft-reject star wheel.
- > Data collection.
- > 21 CFR Part 11 compliance.
- > FAT/DDS/IQOQ documentation.
- > UL, seismic and CE certification.
